

Jean Daniello, Fairfield CT

WRITTEN TESTIMONY FOR HB6856:

Please Pass Governor's bill HB 6856 - overdose prevention by expanding Naloxone access.  
My brother, Andy Daniello, died in 1994 of a drug overdose. 911 was called and they were unable to stop it. I believe if Naloxone was available to the first responders he would have survived and had a chance for rehab. He had been in rehab off and on for 20 years fighting against his addiction. Today there are so many more avenues and protocols for rehab than there were 20 years ago. I believe he would have been successfully rehabbed if he had access to the rehab methodologies of 2015. So, please give the addicts overdosing today the chance they deserve to win their battle against addiction.  
Sincerely,  
Jean - a sister that never gave up and never will!  
Thank you for your support
