

6949

Senator Terry Gerratana, Representative Matt Ritter and members of Public Health Committee,

I realize my email is among hundreds you have received so far. Nonetheless, please consider the following:

I oppose this proposed bill because it is unconstitutional in two areas. It violates parents and guardians' First Amendment rights to free exercise of their religious beliefs, and it also violates our constitutional right to voluntary informed consent. I believe a class action suit follow the passing of this bill, as it is unconstitutional. People know big pharma is behind it, and those supporting it are influenced politically.

We have freedom of religion in this country and freedom of control over our bodies.

Please vote against this unconstitutional bill.

Thank you,
Cynthia Overgard
