Bill 1090

New casinos along I-91, I-95 and I-84

This is not going to raise more revenue for the State of Connecticut.

What will happen is the current casino's revenue will drop and no longer attract more players.

The players will still go out of state.

The current Casino's need a new marketing plan do draw people into the state.

The Casino Marketing should promote and pay for promoting all of Connecticut's arts, museums, historical sites, theaters and destinations.

This will bring more tax dollars to the State and more revenue to the Casino's by being an ambassador to the States fine arts and history.
