Subject: Casino

Please, do not build another casino. The present ones are not as profitable as they once were and a new one is being built in Massachusetts. Why would you want to build another one, which is going to be impacted by the ones we have already. Better to have two doing well, then having three doing poorly. I am totally against gambling anyway. That is no way to get money for the State. We were at one time told that the casino money was going strictly for education. Well, we know that didn't happen. What are we to believe?

Respectfully,

Christa Berthold.
