To whom this concerns

I would disagree with building more casino's in CT. All they are, are money traps to take away hard earned wages. True, the state would get a share of the revenue but like the tow casinos now, that money was supposed to go for education and instead most of it gets put into the general fund to fund the pork barrel special interest groups and some legislatures!

The I-91 corridor is already next to being the state's LONGEST parking lot, I live in Enfield and work in Middletown and must travel I-91 and its always backed up. A casino in North Central CT would only cause more highway congestion! IT looks like to me that the State of Connecticut just wants to start " Casino Wars" with Massachusetts. I oppose new casino's here!

Cut Spending, No more FREE BEES!

Enact legislation to stop and eliminate putting ethanol in our gas over the winters., I watch my per mile average drop 4-6 gallons. Modern cars and trucks are fuel injected and computer controlled for the utmost fuel mileage. This gas really STINKS! I doubt there many Carburetor engines left out there except in antique cars.

Fix the potholes at night when traffic is light. 3 times this week I have been in on the I-91 parking lot trying to get to work, The Pot hole patrol tied up traffic for miles!

Lower the GAS TAX, we pay the highest tax in the nation!!
