**Subject:** I support Bill 1090

**Subject: Bill 1090**

I would simply asked the question how dependent has Connecticut government become on the funds they receive from the two casinos in our state?

Can our state afford 50% less in revenues from those casinos we have allowed to prosper in our state?

I would ask each and everyone of you to walk through Foxwoods resort Casino and look at the outlet mall they are building at this current time, the jobs they have created in building this mall not to mention staffing it once it's open is crucial to Connecticut's economy.

The question is no longer do we want casinos or don't we, we are ready have them, the question is can we afford not to allow Connecticut to stay in the game and keep receiving the funds for our schools or are we going to allow those funds to go to our neighboring states?

My family and I live in Enfield on the East Windsor line where it is possible they may want to build a casino and I would ask you to support this bill 1099.

I support this bill ( short answer )
