Subject: Senate Bill 1090

We have a casino coming in Springfield which will bring enough traffic and crime to Enfield and surrounding areas already. The casino will only bring less time with families and healthy activities. Our society needs to focus more on positive venues to get money for the state, isn't that what it is actually about, how about concentrating on more on education and recreation. We really need people with higher incomes paying more taxes and donating to our state parks and especially education. Who came up with this insane idea anyway????

Pat
