

It is with great concern that I write to you about this subject. As we all know, traffic can be a nightmare on I-95. When the toll booths were in place, it was much, much worse. And let us not forget about the horrible accident that took place where people were killed. Bringing back tolls has got to be one of the worst ideas we've heard in a very long time. Why take a bad situation and make it worse? Getting around is tough enough, isn't it? Tax something else to retrieve more revenue from the already over-taxed people of CT. if you must, but please use common sense and forget about this ridiculous idea of tolls. Even one toll booth would keep us off the highway even more than now. Please, please, don't forget what life was like for us when we had to deal with toll booths! Just a crazy idea...
