As a citizen of Connecticut for 86 years (my whole life) I am absolutely against placing tolls on certain highways where only a few of us will end up paying over and over again to travel to Massachusetts and for them to travel here especially if they work in those areas while others in Connecticut will be free and clear. Hasn't our wonderful Governor thought of enough ways to make life miserable for all of us. I would still like to know where all the money from huge taxes and casinos and the lottery have disappeared over the years.

Maybe if he stops throwing our money away on busways and the expansion of I-95 (which by the time it is finished will be outdated again). A complete waste of dollars. How about some new innovations for traveling without all the congestion. There must be someone out there who can use some common sense and do what's right. NO TOLLS!!!
