

To whom it may concern,

I'm writing and opposing the idea of border tolls. Just as we the citizens have had to tighten our belts, down size, make sacrifices or do whatever it takes to get by and survive as this economy tanked, and that has still not yet recover, the State government should be doing the same. We pay tax for each gallon of fuel purchased so why is it that this money is not being put to repairing the roads and infrastructure etc.? Because it is going towards everything else in this over grown Government in this state and its time for it to get creative as we the citizens have had to do to survive. This has been long overdue. Less government equals less taxes and this state has too many taxes and is getting too expensive to live in. Raising them is not the answer, a good hard look and decisions are what is needed and I hope our elected officials have the courage to do and not let us citizens down. Do what is right.

No to border tolls.
