

I am against the addition of tolls for the following reasons

* Adds congestion* The bureaucracy and infrastructure of toll collections imposes an overhead on the monies received reducing the benefit

Currently Connecticut is a drive thru state due to our high gas taxes. Truckers and out of state travelers fill up before coming here. Reducing our gas tax to have our gas prices on par with our neighbors will increase gas sales to this group creating revenues to fund the roads they drive on

Thank you for your consideration

David Cornell
