

Dear representatives:

I am strongly opposed to having tolls return to CT. I remember the fatal accidents that occurred in the past when we had tolls.(Remember the big crash in Stratford?). It will increase pollution and traffic. It will be a burden to Fairfield County residents who commute to neighboring NY for work as well as local businesses that rely on customers from our neighbors. It will put a financial burden on low and middle class citizens . It will be one more reason to leave the State of CT. There is a weigh station in Greenwich-I-95, which I can not remember the last time I saw it open. Why not utilize the weigh station to raise money since it is over weight trucks which cause the most damage to our highways. I thank you for your opposition to this. And please submit this email for the public hearing. There are six members in my household and all 6 of us vote.
