

Legislators,

How many more ways can you come up with to drive residents out of this state? This state and the way it is governed is absolutely out of touch with its people and what is right. We are outrageously taxed and find ourselves at the wrong ends of national surveys when it comes to taxes, cost of living and most spending ratios for products and services where it comes to our ability to live without additional financial oppression.

To consider making it even more financially difficult and taxing to travel across state lines for goods and services because they are convenient is absolutely without merit. Putting additional financial burden on residents of towns or areas bordering other states is discriminatory.

I and others I know are absolutely opposed to such a tax as border tolls. Connecticut is a beautiful state but the way it is being governed is ugly. It makes you want to leave this state and find other less oppressive places to live.

**NO to Border Tolls!**
