

I am writing to express my opposition to tolls in CT. I live in Shelton and travel every day to NY for work. I'm already paying high taxes for living in CT, I spend a lot of money for gas since I drive a lot, and I think it's equivalent to raising taxes on me everyday I go to work. Even though gas prices have dropped I'd rather spend the money on things my family needs versus giving it to the state government. And what happens when gas prices go up again? We won't decide to take down the toll booths will we- they'll be here to stay- another negative reason to live in CT.

Please do not raise taxes on CT residents by installing tolls.
