

I would like to state that I believe Tolls are needed back in CT but it is a hardship for people to have their town divided in half. Last time the tolls were in place, they were between exit 2 and 3 both part of Greenwich. This is a part of my town Greenwich that I use a lot and I found it very unfair to have my town divided. I really don't want the tolls to divide my town as this puts a burden on my town that no other town in Connecticut will experience

And I might add that since the I-95 bridge fell down the whole population of commuters knows the shortcut around where the tolls once stood so that is another reason that I am asking you not to place them in the same place between exits 2 and 3 as we lived through the traffic on the Post Rd once and we will have to do so again.
