

I am Writing to express my extreme opposition to tolls in Southwestern CT. The tolls have, in the past, caused an unreasonable amount of traffic on our local streets which are already congested even more than they were prior to the removal of the old tolls at Exit 3.

I-95 brings goods and services to all of New England and serves as one of three crossing points to Port Chester NY. Local travelers and people trying to avoid the tolls using current GPS technologies will further impact our local residents and businesses. We already have the burden of having I-95 bisecting the Town we should not be faced with the congestion pollution and disruption that tolls would cause. In addition my business is between exit 2 and 5 while I try to avoid 95 it is convenient to go from 2 to 5 without paying a toll.
