

I have lived in Ct my entire life and I am 63 years old. Adding tolls in this State is entirely a waste. I remember when the Legislators eliminated all the old tolls because we had many deadly accidents , auto emissions were high, tied up traffic even worse that it was and it was unfair to the people who lived near them because they might only have to drive a mile and pay a toll and other residents could drive most of the state and never have to pay a dime.

I remember when the State made their deal with the Casinos we were going to be all set the gambling was going to pay out freight , then we got income taxes, more gas taxes etc. When does the State stop spending like the Federal government. People love Ct but are not going to stay here while you continue to raise taxes, they are going to become Florida residents or somewhere else to beat the system. Stop giving away monies to companies to stay in Ct do we really think Sikorsky is going to move out!!!!!!!!!!!!!! No way could they move.The real problem is all the deals we have with State employees who get a pension after 20 years in.

I owned my own Company and never had those benefits. Guess what the State pays them a pension and they go get another job somewhere else and collect two salaries! NICE
