

We see enough reasons to believe that tolls are not in the best interest of CT residents.
They will be another financial burden on already overtaxed CT residents.
Tolls will lead to congestion on local roads near borders.
They will negatively affect the economy of western CT due to less New Yorkers driving into the state to shop at the Danbury Fair Mall.
After the system is built, funds will be diverted to the general fund which has occurred in prior years.
We urge you to consider an alternative to funding the deteriorating infrastructure in CT.
