

This email communication is against the establishment of tolls in Connecticut.

This is simply an additional tax on Connecticut drivers. May I remind the legislature that the gas tax was established to replace the income generated by tolls when they were removed due to safety concerns.

If tolls are reinstated then the gas tax should be repealed - otherwise this is just a double-talking scheme to raise more money so that the State of Connecticut can continue to spend beyond its means.

Reduce spending rather than collect tolls!
