

I live in Danbury CT and I oppose the toll for the borders of CT. Interstate 684 and Interstate 84 already has enough stand still traffic everyday. You will encourage noise and air pollution, if you add tolls to this area you are endangering Danbury and Putnam County, New York. This area is located on watershed property. Think of all those tractor trailers leaking oil, and everyday commuters standing still to pay a toll. This is not fair for our environment. Susan Grady
