

Please do not impose TOLLS on drivers in CT. We are already OVER TAXED and this would be more detrimental to our already congested highways. Tolls would also be a safety hazard as big rigs and high volume traffic attempt to negotiate the toll booths. Our roadways are major conduits to upper New England and we don't want to be known to visitors and tourists, and potential residents, as "that state that perpetually slows us down and then takes our money"; we want to attract people and let them visit our businesses - maybe even establish a residence or business in CT.
