

What is the governor thinking of. This is one of the most expensive states to live in in the US. People are selling and leaving daily because they will either run out of money in retirement if they stay here or they want a better life not available here in Ct with the current economic situation. Between the property taxes, Personal Income Tax, Sales Tax just to mention a few, now border tolls, which is really another tax. No border tolls. Why doesn't this state cut the state work force, and put a halt to spending, and balance the budget!
