RE: Testimony for 2/25 Public Hearing, Hartford on HB 6818:Electronic Tolls, State Borders

Please enter our below testimony as public comment:

We moved to our home in CT in 1991. Since then taxes have continued to grow, cost of living has gone up hugely, but state economic growth has stagnated or gone steadily down. How about cutting wasteful spending and looking for operational efficiencies to rebuild transportation infrastructure? Increase revenue by lowering taxes and making the state economically more friendly to small business and residents.

Re-establishing tolls will only serve to discourage the state's already depressed business growth, and impose yet another tax on its OVERTaxed residents.

Thank You,
Tony, Ellen and John Jacob-Fitsch
