

Please, please DO NOT CONTINUE cutting down OUR TREES (particularly the mass, totally unnecessary assault) here in the State of Connecticut. Citizens are even given to wondering if the trees are being cut down for “mulch”, and ultimate sale back to the general public – for another source of state revenue. Outlandish as this might seem or sound, it isn't entirely out of our thoughts to wonder.

The citizens/taxpayers in the State of Connecticut MUST be allowed to know the state's plans ahead of time, hear the reasoning/truth behind it, and most importantly be allowed to vote on it. The TRASHING of our landscapes/wilderness MUST STOP.

Years and years ago, my grandmother would say when she visited from Pennsylvania, that she loved the bounty and selection of beautiful trees in CT. A joy to see when she came to visit. How more than appalling and un-necessary this ripping down of our countryside is for ALL of us. Above all else, this vast destruction of wilderness is unacceptably, unavoidably, irreversibly hostile and deadly for ALL wildlife. As importantly, these trees “filter” the polluted air emitted along the heavily traveled roadways. As well, they keep surrounding land from eroding.

PLEASE, PLEASE STOP this meaningless destruction of nature!!!

Thank you.
