

**TESTIMONY OF SAMIA HUSSEIN SUBMITTED TO THE APPROPRIATIONS AND HIGHER EDUCATION
COMMITTEE ON FEBRUARY 10, 2016**

***H.B. No. 5044 - An Act Making Adjustments to State Expenditures for the Fiscal Year Ending
June 30, 2017.***

Co-Chairs, Ranking Members, and members of the Committee, although I am previous employee of Central Area Health Education Center, I was also once a participant of the Collegiate Health Service Corps (CHSC) with Central Area Health Education Center (AHEC), Inc. The CHSC program provided me with resources and hands on experiences to explore different health careers. As an employee, I have gained valuable skills such as leadership, program management, and public health program implementation. Without my involvement as first a CHSC participant who transitioned into a CHSC coordinator, I wouldn't have been able to meet inspiring health professionals, obtain instructor CPR certification or implement meaningful service learning projects with other student participants in the community at large. I am a resident of Windsor Locks.

The CT AHEC Program or network directly supports primary care workforce development in the state by “connecting students to careers in health, professionals to communities, and communities to better health.” Funded since 1997, the CT AHEC Program provides state-wide services to more than 10,000 residents, annually (<http://www.publichealth.uconn.edu/ct-ahec.html>). As the demographics of the state continue to change, the primary care workforce must expand and respond to meet those changes. The CT AHEC Program is an invaluable resources to address these challenges at both a state and local level.

The CT AHEC Program utilizes federal, state and private funding to support:

- Inter-professional education and community based training programs for health professions students
- Promotion and retention of primary care providers in collaboration with state agencies
- Cultural competence and medical interpreting training to health professionals and trainees
- Dissemination and recruitment of health professional trainees in the National Health Service Corps
- Continuing medical education programs for public health and health care professionals
- pipeline educational programs to raise awareness of health careers for pre-health professions learners

As part of the primary care workforce development in the state, the CT AHEC Program provides leadership for the State Innovation Model grant's Community Health Workforce Development and Integration (<http://www.healthreform.ct.gov/ohri/site/default.asp>). Bringing collaborative stakeholders together to build infrastructure, policy and sustainability to the development of a Community Health Worker workforce in Connecticut. Likewise, CT AHEC's support of the Health Occupations and Technology Careers in Connecticut (HOT Guide) provides residents with an invaluable resource to learn about health and biotechnology careers and opportunities in the state (www.healthcareersinct.com).

Supported by federal, state and private dollars, the CT AHEC Program Office is located at UConn Health in Farmington, CT. The 4 regional AHEC Centers in collaboration with the Program Office extend UConn Health's reach state-wide. The AHEC Program responds to local needs and partnerships that address community health needs which include oral health, veteran's mental health, youth mental health first aid, teen health literacy, homeless and migrant farm worker access to health care.

I have been fortunate to be part of this program which allowed me to further my life and educational experiences. As a program participant, I have benefitted tremendously in working hands on with public health service projects. This has reminded me of my person goals of pursuing careers in the medical and/or public health field. Later on, I was blessed with a full time position at Central AHEC which allowed me to gain valuable work experiences such as program planning, management, and implementation. I was able to coordinate health programs that helped reduce heart disease and stroke, taught CPR classes to students, participated in the Migrant Farm Worker program, networked with Community Health Workers in the State of Connecticut, and developed grant writing skills used at my current place of employment. I urge you to continue funding streams to the CT AHEC network. I am only one of many in the state who have benefited from the mission and vision of this organization. The work experience and skills I gained as a program

participant has motivated me to pursue public health. In fact, I am currently pursuing my Masters in Public Health at the University Of Connecticut Health Center. The CT AHEC network is of value to not only students like me but also to the community at large. Limiting funding in any way can be detrimental to the health and well-being of CT citizens.

In addition, Central Area Health Education Center (AHEC), Inc. is part of the Connecticut AHEC Network (CTAHEC) and was followed by Eastern AHEC, the first nonprofit 501(c)(3) AHEC to open its doors in Connecticut on **February 29, 1996**, celebrating 20 years as an established organization this month.

I cannot express the consequences and unreplaceable void this would leave for the state of Connecticut. I personally feel that if CT AHEC Network is not restored its funding that it would be very detrimental to the community.

Thank you for your consideration of my testimony. Below is my contact information for your convenience.
