SB 305 "An Act Establishing a State Film Permitting Process"

March 2, 2016

Hello:

I am writing to voice my support of SB 305. I have produced and directed six low budget feature films here in CT and feel that streamlining the film permitting process is a great idea that will help simplify the process for in-state and out-of-state productions that come here to produce content that utilizes State of Connecticut property, roads, and highways, etc.

The Office of Film, Television, and Digital Media has been very helpful to our productions so making this the official process makes great sense for the industry.

Thank you,

A.D. Calvo
