To whom it may concern:

I am writing this letter in support of the AFP project. I am currently enrolled in AFP and without the support that I have been receiving I do not believe we would be making the remarkable progress we are making. As our state is encouraging all Child Learning Centers to work towards high quality the AFP program is providing the training, the support and encouragement to make this happen. My AFP facilitator has made numerous site visits to help us in our journey towards accreditation. The changes we have made in our program have been extremely beneficial. The quality is high and our staff has received invaluable professional development. The resources are such a benefit to small programs that could not afford to go through accreditation. In Southeastern Connecticut many of our facilities are small facilities AFP has made it possible for us to grow in quality it would truly be a shame to lose such and asset.

Respectfully

Patricia Testa
