

**Patrice Clynes**  
**Elementary Math Specialist**  
**Southington Schools**

This testimony is in support of HB 5467 An Act Establishing a Red Ribbon PASS program:

The math specialists have been encouraging PASS activities in the area of fact fluency. We have used PASS as one of the math stations in our most recent fact fluency professional development sessions and in many of the elementary schools you will see facts on walls. These facts on the walls are strategy based and are used in a mid-line crossover. I've attached a link to a video in the google drive as well as a photo. As you know crossing the mid-line stimulates both sides of the body. What a better way to use both right and left brain to develop fact automaticity and be physically active!
