

Dear Committee Members,

Once again I am giving written testimony and support for this Legislation on “An Act Concerning Dyslexia”.

As stated previously, my grandson as well as my daughter is Dyslexic. We need to put an end NOW to one of the stigmas within our society of not having enough trained personnel in order to recognize the first signs of this frustrating disability.

Stop with the excuse of having a child to repeat a grade “because they are not as mature” as the other children their age. This is a smoke screen of an excuse!

Early testing, tools provided by the school such as the Dragon, IPods, and computers also mentors are needed. Everyone cannot afford these necessities.

My grandson has shown great improvement but not enough for me to feel that he is on easy street.

Please provide your much needed support. These are our future, scientist, lawyers, Politian’s and doctors.

Humbly submitted by,

Doreen McGee
