

Greetings all~

Please support HB 5315.

Bears are here. As in Alaska we gave to be able to live with them. They do this in Alaska. I know, I have been there 3 times. Even 60 miles into Denali, where there are grizzlies, the bears left alone leave people alone.

We must send our children a message that we are custodians of Earth and her living beings.

Also, it has been scientifically proven that when predators are re-introduced the whole ecosystem is restored and in balance. We cannot continue destroying because ultimately we lose.
