

YOU have the opportunity to do something really positive by voting for this bill: HB 5315-Requires signage in state parks and forests that shows people what to do when they encounter bears. It would also promote regulations that prohibit the feeding of bears.

Black bears are rarely ever dangerous BUT, when someone stupidly takes pictures up close of a bear-as happened this past year in Granby-something needs to be done. Properly posted signs would catch peoples attention and would make them aware of the problems they could bring about if they don't heed them.

I'll be watching and hopeful that you vote for this very positive bill.
