

My husband and I are residents of East Haddam and live on Bashan Lake. I am writing to you in support of the Bashan Lake Drawdown bill (HB 5538) being introduced to the Legislative Environmental Committee. It is important to the vitality and environmental well being of our lake and its surrounding properties that the Town of East Haddam be granted the authority to make decisions regarding when and how much our lake should be drawn down to make necessary property repairs and control weeds, as specified in the proposed bill.

Thank you for your support,

Cheryl Duey & Jim Ingala
