Subj. : House Bill # 5583, concerning water levels
In Bashan Lake, East Haddam.

As a 55 year seasonal resident of East Haddam at Bashan Lake, I would encourage your support of Bill # 5583.

Lowering the lake water level during winter months is essential to protect all shore line man made and natural appurtenances from damage due to shifting ice sheets on the lake. The yearly cost for repairs required when the ice moves at the lake high water level can be substantial for lake residents.
