

Dear Senator Kennedy,

2-19-16

Brewer Bruce and Johnson's employees, families and I are writing you in opposition to Senate Bill No. 78 relating to modifying C.G.S. 22a-92 (c).

Eliminating open water dredging disposal will put huge additional expenses on already struggling Connecticut businesses. Inevitably leading to further unemployment and financial hardships in our shoreline communities.

Apparently some New Yorkers are opposed to Connecticut dumping in the sound. Do they feel strongly enough about this to also eliminate open water disposal for their state? How about New York Harbor? Hudson River? How about New Jersey? I feel we are being singled out by an over zealous minority.

Very truly yours,

Ed Vianney, General Manager, Brewer Bruce and Johnson's Marina
