

John,

I consider your letter to be well researched , well written and appropriately represents the feelings of the CHMA. .I have two observations...

1. I would have suggested a slightly rewording of a sentience in paragraph 5 , letter a. under **Comments and recommendations** which currently reads "*the lack of fine grain material suitability for beach nourishment*" to "*the extremely limited suitable use of fine-grained material for beach nourishment* "

2. You might want to consider if a wider distributions of this letter might promote the Association's concerns to other parties who may be able to assist our efforts.

Thank you

Bill Rock, SWHMC
