

I strongly support the concept of a constitutional amendment for CT that would help protect open space and farmland currently owned by the State Government, but lacking needed protection by DEEP or the Department of Agriculture's Farmland Preservation Program.

I must say that I think the actual language of the proposed legislation needs to be tightened up and clarified, so that the lands in question are only State-owned properties that will be permanently protected by the Department of Energy & Environmental Protection, or through the Department of Agriculture.

Sincerely,

Henry Lord
