

HB 5427

Anthony Dominski  
226 Fountain St # 609  
New Haven, CT

Dear Energy Committee,

The 15-year provision for utility purchase of PV solar energy is a deal killer. It should be 25-30 years.

If we want to grow the solar industry in CT, we should not discourage it.

In essence, government-sanctioned monopolies UI and EverSource are competing with it's own customers. This is not the intent of their monopoly charter. Shared solar offers value to the grid and its investors.

Please don't allow our electric utilities to kill CT solar in the crib.

Thank you.

Tony
