

Dear Representatives,

Regarding shared solar and HB Bill 5427. There are many neighboring states as well as many others that have enjoyed shared solar for some time. They have significantly increased the use of solar over and above CT's. I am on the Avon Clean Energy Comm. I live in a 1200 unit condo in Avon .There are a large number of condo units in CT. We do not own our roofs and therefore can't install solar. Apt 's and other facilities not facing properly also require community solar. Pilot programs are a waste and a delay since many states employ community solar with great success.

Please allow the subject bill to allow for community solar. Our CT residents need it and want it. Please do so immediately for reduction of our carbon footprint and good economics.

Regards from your citizen,
Martin Kaplan Ph.D.
