This double tax on ambulatory surgery centers has to be phased out. I have used a surgery center twice and I found it to be much better than when I went to out patient at the hospital. I was able to get into the prep room much faster than the hospital. The staff there was wonderful and well organized also knew what they were doing. I was in the operating room quickly and out quickly. I received wonderful care and was very pleased. We need more of these centers and with more taxing we won't see this happening. Time to give the tax payers in Connecticut a fair break!!!!
