As your double taxing a person in this state 3 people leave for better standard's of living!
Be pro-active and not reactive.
Lower government standard's and pay to equal what the voter's deal with daily and to correspond to the people's living standard's.
On an even level with the people paying tax's! I don't get raise's every year and I certainly don't have the retirement package's a gov't. official get's and probably will never come close to it.
I'm self-employed and pay dearly for it. Been in same trade for over 30 yrs. and am profitable but every time I just get ahead the tax man is there to bring me back down. Why should I have incentive to do good by this state when my tax and utility man just proceed in asking for more money from me???

Has anyone actually sat down together in the state to put together what the average citizen is paying for tax's altogether including state,federal,local,and utilitie's??? How much is too much???

Why do I pay a gross earning's tax on my utilitie's profit??????????
