Please phase out this House Bill 5493. Our hospitals, medical centers and ambulatory surgical centers are very, very, very, very important to the health concerns of Connecticut's citizens. Governor Malloy has to stop taxing such important items regarding anything medical. He wants to save money? cut out the waste in CT. Make Husky users accountable i.e. request all persons living in a household (whether married or not) IRS tax returns since you have non-working women with kids "shacking up" with men making over \$100,000!!!! Also yearly income accountability on subsidized housing - again people making \$100,000 ± who should not be living in subsidizing housing taking away from people who really need it!!!!
