This is disgusting that you are going to tax the out-patient surgical centers again. This is exactly why companies, businesses and people are leaving this state. We are fed up with what these Democrats are doing in this state! And you wonder why in the federal election "We the People" are going with candidates not in politics. We are fed up with the democrats and their liberal spending habits. We have a governor who decided to have the Fast Track buses running and they are running most of the day empty. Now he wants to expand it to all parts of the state when the one around Hartford is failing. The price of the bus way started at \$7 million and has gone to \$17 million. Next he wants to have the train running from New Haven to Springfield, MA. All that this train will be is a drug run train to spread drugs. What about the cars that all of these people in the state have? It costs us millions a year!!! Please look at everything in the budget and evaluate what is costing "We the People" and get rid of all of the waste and million dollar ones that won't help CT. Please start spending the money on items that will help most of the state. Spend money on ROADS and Bridges that will correct all the potholes and bridges! Stop taxing people and companies with ideas of wasting our taxes on wasteful projects!
