How can a tax be imposed that is entitled "phase out a tax on Ambulatory Surgery Centers". If it is a new tax, then the voters should not be fooled into thinking it is phasing out an existing tax. Shame on the sponsors.

How can legislation be introduced that has no stated legislative purpose? If this practice is customary in CT, the legislators ought to go back to school for some remedial education in government. To quote Judge Louis Brandeis "sunlight is the best disinfectant." Is this proposed legislation just an attempt to tax only those least able to resist? Less stealth, more clarity.
