I oppose the tax the State wants to place on car washes. Not only would it be a burden to the small business owner, it would mean higher cost of maintaining a citizens vehicles. This because of the chemical the State is now putting on the roads. I've seen and heard of newer cars having their brakelines rot out and cancer starting on the undercarriages. God only knows what that stuff is doing to humans and animals because of the run off into the water systems. I know it's "safe". Think Flint Michigan.
