I do not support the enactment of Senate Bill 337. How are we as consumers to support these small businesses with an increase in the cost of a car wash by adding this ridiculous tax!! Let's face it, car washes are not cheap by any stretch of the imagination but it is considered essential during the cold, snowy winter months where our outside water lines are shut and we need to remove the salt/calcium & dirt from our vehicles. This is to me considered essential car care. This tax would force car wash owners to lay off/let go some of their employees due to the fact that fewer people would utilize this service because it now costs a few dollars more. Car wash owners are just trying to get by like all other small businesses in Connecticut.
