The state of CT instituted a new salt product for winter ice treatment which is costing residents much more money in the winter months for car washes. The salt product is known to rust the underside of all known vehicle types. Introducing a tax for car washes just burdens residents in CT again. A tax on a tax. There needs to be some relief for the people of this state. If nothing else, give us this! Do not tax us on car washes we are FORCED to get due to the implementation of a product we have no say in.

Thank you.
