Connecticut business continues to be hammered by our State legislature. Death by a thousand taxes. How about a special exclusive tax on State legislators lunches, license plates, miles driven, car maintenance, cell phone bills, suits, and office supplies? Get the point, enough is enough. Cut state spending back to 2010 levels and continue to reduce from there. Cut welfare subsidies back to temporary assistance levels to force people back to work or...yes that means any work available. Put in tolls back on 95, and bump up the gas tax as long as the monies specifically go into the highway fund.
