Senate Bill 337 must pass! The "car wash tax" is ridiculous and detrimental to individuals and businesses. Because of it, the car wash I prefer has raised prices to the next whole dollar to accommodate their automatic payment system. I don't blame them for raising the price as they were one of the most economical and probably couldn't absorb the tax. With all the other price increases in the state due to new taxes, I have cut back on using the car wash unless essential to protect my vehicle from winter road conditions as another dollar each time is just too much. I have heard that some car wash businesses are just eating the tax rather than raising prices - this is wrong, they should not have to do this. The "car wash tax" is just another harassing burden on Connecticut's businesses and citizens!
