Haven't you taxed us enough without trying to squeeze every last nickel you can out of us? I've had about 50 friends, acquaintances and relatives move out of state over the last 4 years of so and some of the reports I get back from them that they are paying but a fraction of the state and property tax they were paying in CT. They were all, by and large, productive tax-paying individuals, not depending on government. Now they will never pay taxes in CT again. Keep up the "good" work and I'll keep on counting the people escaping from your continued tax oppression.
