We are retired. Because of the over spending of our State Government, we the tax payer is again trying to bail out the State. Irresponsible spending, unnecessary hirings, bad union contracts ( bonus for years of service, laughable). All we do in this state is pay and pay. My wife and I love this state, but are realizing that living here in the future is not going to be possible. We watch are spending. Why shouldn't the State watch theirs. Its only the middle class that seems to always be paying. Put the tolls on the roads so that everyone who uses are roads pay their share that will help some.
